

Digital Competence Results

2nd Quantitative evaluation

Students from the partner countries of the project participated in our final survey to tell us how they have developed their Digital competence. One of the target is the increasing number of the students that evaluate and filter information or if they use social media in international environment for educational purposes.

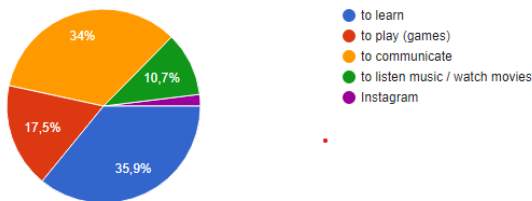

Which digital device do you use the most often (you can choose only one)

103 risposte

For what do you use digital devices most often? (you can choose only one)

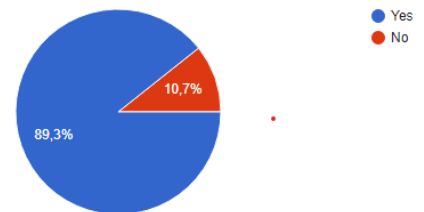

103 risposte

64,1% of the total number of students use mainly mobile phone, 35,9% uses it to learn and 34% to communicate.

Are you browsing, searching and filtering information?

103 risposte

At the question “are you filtering information”

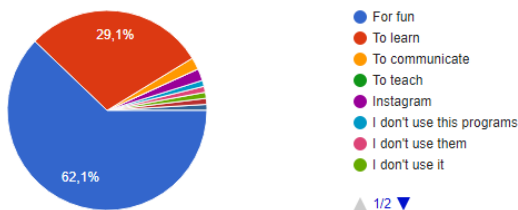

We have decreased from the 16% to 10,7 % the percentage Of students that do not evaluate information.

The number of students (45,4 %) that use their devices to learn in the first evaluation, has increased to 57,3%.

The students use them properly enough. They use photo, audio and video editing for fun.

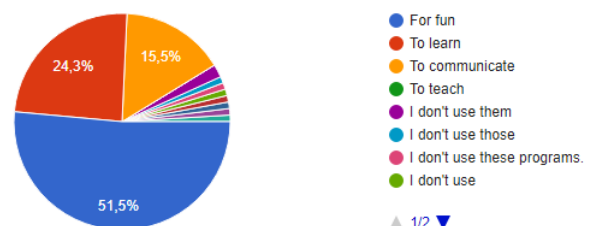

Why do you mostly use programs for editing pictures or photos?
