

# European Competence Results

2<sup>st</sup> Quantitative evaluation

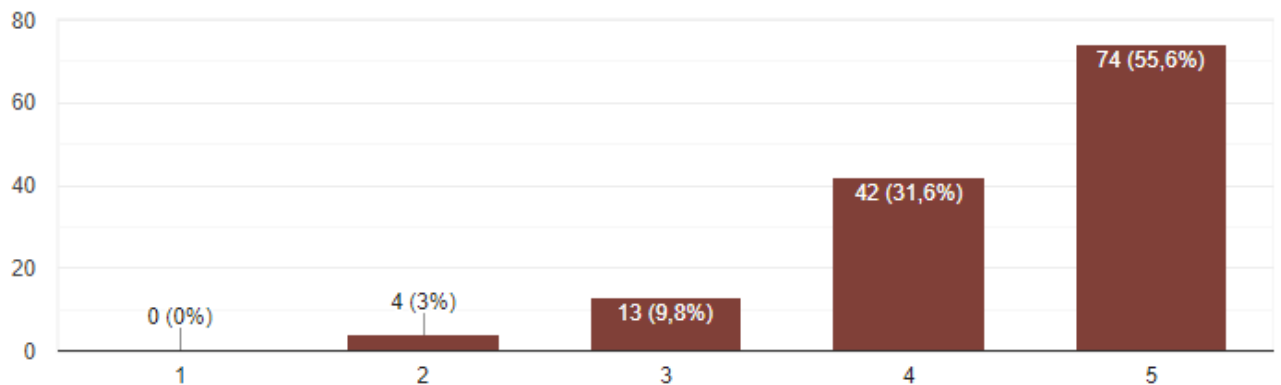

The students from the partner countries of the project participated in the first and second survey to tell us about their European competence in the fields of KNOWLEDGE, SKILLS and ATTITUDE according to the European Framework of Competence. In the field of KNOWLEDGE, among geography, history, and culture, most of the students feel more confident in geography than other subjects. This happens because geography is a subject that the students learn at school. In the second evaluation the number of students that have a better knowledge about history and culture of the partner countries has increased (after the mobilities).

My knowledge about partners countries:

In the field of SKILLS, related to the interaction in English language, we decreased the column 3 from 18,1% to 9,8% an increased the columns 4 -5 respectively from 29,7% to 31,6% (col. 4) and from 40% to 55,6% (col. 5).

I can communicate in English with my friends from the partners countries

2018-1-DE03-KA229-047161

## Digital Tourist Guide via ICT

In the field of ATTITUDE, we succeeded in increasing the column 5 from 34,8% to 74,4%.

I am aware that behaviour of my partners could be different because they have different norms and values.
